DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1 and 18, drawn to a magneto-optical recording medium, classified in class 428, subclass 694M+.
 - II. Claims 17 and 19, drawn to process of, and an apparatus for, using a magneto-optical recording medium, classified in class 369, subclass 13.01+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use/apparatus for use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using/apparatus for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using/with a materially different apparatus for using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using or with a materially different apparatus for using, such as front-aperture-detection magneto-super-resolution (FAD-MSR), rear-aperture-detection MSR (RAD-MSR), or center-aperture-detection MSR (CAD-MSR), as opposed to the claimed Domain Wall Displacement Detection (DWDD) method (see *applicants' specification, pages 2 – 11*).

Art Unit: 1773

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to William Daley, Jr. on March 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M Bernatz whose telephone number is (703) 308-1737. The examiner can normally be reached on M-F, 9:00 AM - 6:00 PM.
